

INTRODUCING

# Mirage Suite

From legacy complexity to governed data products.

Discover | Decide | Deliver | Retire

Turn today's complexity into tomorrow's opportunity.

## LEGACY ANALYTICS ESTATE

Complex. Fragmented. Costly.

Multiple data sources

Silos and duplicate data

Cryptic code and ETL jobs

Unknown ownership

Hidden dependencies

High run cost and risk

## Mirage Suite

AI-POWERED CONTROL PLANE

- Discover
- Plan
- Decide
- Align
- Build
- Prove
- Migrate
- Retire

EVIDENCE

STANDARDS

AUTOMATION

HUMAN JUDGEMENT

REAL IMPACT

## GOVERNED DATA PRODUCTS

Simpler. Trusted. Future-ready.

**Owned & accountable**  
Clear ownership and stewardship

**Trusted & governed**  
Standards-aligned  
(e.g. TM Forum SID)

**Discoverable**  
In marketplace

**Reusable**  
Across domains

**Lower cost, higher value**  
Run only what adds value

### Lower scope

Retire, archive, consolidate before you build

### Higher value

Move what matters, not everything

### Faster delivery

From idea to production, with AI acceleration

### Greater trust

Lineage, ownership, classification and audit

**Mirage Suite** | Data modernization for a smarter tomorrow.

PEOPLE + AI + GOVERNANCE = REAL OUTCOMES

Mirage Suite

# Turn legacy complexity into governed products.

A CONTROL PLANE FOR BROWNFIELD TRANSFORMATION

DISCOVER / DECIDE / DELIVER / RETIRE

Do not migrate the estate.

**Migrate the products  
it was meant to be.**

## Legacy Estate

Complex. Opaque. Expensive.

## Mirage Suite

MIGRATION CONTROL PLANE

EVIDENCE / GOVERNANCE / HUMAN IN CONTROL

## Governed Data Products

Owned. Trusted. Reusable.

- Clear ownership
- Trust & lineage
- Standards aligned
- Discoverable
- Reusable
- Measurable value

### Lower Scope

RETIRE, CONSOLIDATE, AVOID

### Higher Value

INVEST IN WHAT MATTERS

### Faster Delivery

ONE PRODUCT AT A TIME

### Greater Trust

EVIDENCE, OWNERSHIP, CONTROL

THE BROWNFIELD REALITY

# Critical data logic is buried in complexity.

Years of growth, changing teams and tactical development have created fragmented estates that are expensive to understand, harder to change and riskier to operate.

Before transformation can begin, we need  
**a clear view of what exists.**

## The consequence

Migration scope grows by assumption, not evidence.

### Higher cost

More to migrate, more to run

### Longer timelines

Time spent understanding, not delivering

### Higher risk

Critical logic missed or misunderstood

### Late ownership

Product boundaries defined too late

### No clear finish line

Estate keeps growing, even in the cloud

THREE COMMON APPROACHES. IMPORTANT WORK. INCOMPLETE ANSWERS.

## Each solves a part of the problem. Brownfield transformation needs more.

Migration is not just about moving data or building new. It requires a connected, governed journey from legacy reality to data products.

Mirage is the missing transition layer —  
**bridging what exists  
with what's next.**

### Script Factories

Convert at scale

- ✓ Fast conversion
- ✗ No disposition
- ✗ Copies complexity
- ✗ Little business context
- ✗ Legacy cost often remains

#### RESULT

Moved, not improved.

CONVERT  
WITHOUT CONTEXT

### Catalogue-Only Programmes

Discover and document

- ✓ Visibility of assets
- ✓ Broad metadata
- ✗ No decision framework
- ✗ Still unclear what to migrate
- ✗ Does not drive execution

#### RESULT

You know more, but still  
keep too much.

DISCOVER  
WITHOUT DECISIONS

### Greenfield Product Studios

Build new, the right way

- ✓ Modern architecture
- ✓ Product mindset
- ✓ Excellent for new use cases
- ✗ Silent on the live estate
- ✗ Does not address legacy exit

#### RESULT

Great for the future,  
not for what you have today.

BUILD  
WITHOUT LEGACY EXIT

### Mirage Suite

A control plane for brownfield transformation

- ✓ Discover with evidence
- ✓ Decide before you build
- ✓ Align to standards
- ✓ Generate and review artifacts
- ✓ Drove, migrate and retire
- ✓ Deliver governed data products

#### RESULT

Less to migrate.  
More value to the business.

GOVERNED  
DATA PRODUCTS  
OWNED. TRUSTED.  
REUSABLE.

## INTRODUCING MIRAGE SUITE

# A complete, evidence-driven journey from legacy to governed data products.

A suite of focused tools, a unified control plane and a clear path to value.

Nine tools.  
One control plane.  
**Real outcomes.**

### Powered by a unified control plane

Common workspace, agents, governance and migration repository across all tools.

Evidence first

Human in control

Integrated artifacts

Measurable value

### OUTCOME

**Less to migrate.  
More value to the business.**

THE EXECUTIVE OUTCOME

# A modernisation programme that delivers **real business outcomes**.

Smaller scope. Higher trust. Controlled change. Visible completion.

From migration activity to **measurable business value**.

## Lower scope

Retire, archive and consolidate before platform build spend.

DO  
LESS  
BETTER

## Higher trust

Lineage, ownership, classification and confidence attached to decisions.

EVIDENCE  
BUILDS  
TRUST

## Controlled change

One product at a time with dual-run, reconcile, consumer switch and freeze.

REDUCE  
RISK,  
INCREASE  
CONFIDENCE

## Visible completion

Objects, infrastructure, licences and risk demonstrably leaving.

LEGACY  
COST  
ACTUALLY  
LEAVES

DISCOVER  
WHAT EXISTS

DECIDE  
WHAT MATTERS

DELIVER  
GOVERNED PRODUCTS

RETIRE  
LEGACY WITH CONFIDENCE

### KEY MEASURES

**Scope**  
% avoided

**Trust**  
Reconcile pass  
& conformance

**Adoption**  
Consumers  
onboarded

**Exit**  
Infrastructure  
& licences released

*"It's not just a migration. It's a measurable exit from legacy."*

## TECHNICAL ARCHITECTURE

# A control plane for brownfield transformation. Decisions in context. Execution in your ecosystem.

Mirage sits above the runtimes. It discovers evidence, records decisions, generates artifacts and gates progression — while your platform executes.

Your platform.  
Your ecosystem.  
**Mirage orchestrates the journey.**

MIRAGE SUITE

# End-to-End Mirage Journey

From discovery to decommission. A governed path to real business value.

DISCOVER | DECIDE | DELIVER | RETIRE

Nine connected workspaces.  
One journey to a modern data future.

PEOPLE  
AI  
GOVERNANCE  
REAL OUTCOMES

#### Lower Risk

Evidence-led decisions at every stage

#### Higher Efficiency

Automate the heavy lifting

#### Faster Time to Value

From assessment to products, in waves

#### Lasting Impact

Retire legacy. Unlock innovation.

Mirage Suite | Data Modernization for a Smarter Tomorrow.

SAME DATA. A BRIGHTER TOMORROW.

THE PLATFORM EXPERIENCE

## One experience. Full control.

A unified workspace to run the migration programme — with clarity, collaboration and confidence.

From complexity  
to a single pane of truth.  
**Built for real transformation.**

### Align stakeholders

One view. Shared accountability.

### Accelerate delivery

From evidence to execution.

### Demonstrate outcomes

Progress you can measure.

THE SUITE IN ACTION

## Purpose-built tools. A connected suite.

Each tool solves a specific job. Together, they turn legacy estates into governed data products.

Different tools.  
One platform.  
**Real outcomes.**

### 01 Mobilize Prepare for success

Set up, onboard, align stakeholders

### 02 Atlas Discover what exists

Inventory, lineage, usage evidence

### 03 Horizon Plan and prioritise

In-scope plan, dependencies, waves

### 04 Verdict Decide with evidence

Migrate, rebuild, consolidate, retire

### 05 Compass Align to standards

Map to SID / enterprise model

### 06 Forge Build for the cloud

DDL, pipelines, DAGs, reports, docs

### 07 Prove Validate with confidence

Dual-run, reconcile, sign-off

### 08 Transit Migrate one product at a time

Consumer switch, freeze, production

### 09 Sunset Retire and close

Prove exit, release cost, close change

FROM  
COMPLEXITY  
TO CLARITY.

BUILT FOR  
WHAT'S NEXT.

**End-to-end coverage**  
From discovery to retirement

**Human-in-the-loop**  
Decisions with accountability

**Standards-driven**  
Aligned to your data model

**Measurable outcomes**  
Less to migrate. More to gain.

Turn complexity  
into opportunity.

THE BUSINESS IMPACT

# Real outcomes. A stronger data future.

Less to migrate. More to gain. A modern, trusted, product-focused data ecosystem.

From migration programmes to **measurable value.**

## Lower scope and cost

Retire, archive and consolidate before platform build spend.

**35-60%**

fewer objects migrated (typical)

## Higher trust and quality

Lineage, ownership, classification and confidence attached to decisions.

**90%+**

assets with business metadata and ownership

## Controlled change

One product at a time with dual-run, reconcile, consumer switch and freeze.

**2-4x**

fewer production incidents during cutover

## Visible completion

Objects, infrastructure, licences and risk demonstrably leaving the organisation.

**100%**

retired estate with evidence

- ✓ Systems decommissioned
- ✓ Licences released
- ✓ Risk reduced
- ✓ Cost baseline lowered

## A better conversation with the business

Defensible investment

Fund what matters, not what exists

Measurable progress

Track avoidance, adoption and retirement

Lasting value

From data estate to data products

*Completion is not when everything is migrated. It is when the legacy is gone and value is live.*

GOVERNANCE BY DESIGN

## Human-in-the-loop at every step.

Automation accelerates. People decide. Accountability delivers trust.

Technology at scale.  
Human judgment  
where it matters.

| STAGE                                         | Discover<br>(Atlas)                                                                                                      | Plan<br>(Horizon)                                                                                                                   | Decide<br>(Verdict)                                                                                                     | Align<br>(Compass)                                                                                                               | Build<br>(Forge)                                                                                                                                       | Validate<br>(Prove)                                                                                                                              | Migrate<br>(Transit)                                                                                                                        | Retire<br>(Sunset)                                                                                                                              |

PEOPLE  
GIVE DIRECTION.  
MIRAGE  
GIVES MOMENTUM.

**Clear accountability**  
Defined roles and approvals  
at every gate

**No silent ownership**  
AI drafts. People approve.  
No unsupervised  
publication.

**Audit ready**  
Every decision, change  
and artifact is versioned  
and traceable.

**Faster, better decisions**  
Evidence + expertise

**Reduced risk**  
Governed progression

**Higher adoption**  
Business ownership

**Sustainable outcomes**  
Change that sticks

# Mirage Suite

DISCOVER / DECIDE / DELIVER / RETIRE

OPERATING MODEL FIT

## People, platforms and products. Working together.

Mirage Suite fits into a proven operating model — from enablement to marketplace.

Different capabilities.  
A connected model.  
**Greater impact.**

### PEOPLE & CAPABILITIES

#### Enablement

Build capability and ways of working

- Training and playbooks
- Standards and guardrails
- Change management
- Community of practice

PEOPLE READY

#### Packaging skills

Turn existing assets into products

- Product thinking
- Contracting and SLAs
- Reusable components
- Onboard to marketplace

ASSETS PRODUCTISED

#### Product builder

Create new platform-native products

- Use case development
- Rapid build and test
- Standards by design
- Publish to marketplace

NEW PRODUCTS

#### Mirage Suite

Estate migration control plane

- Discover, decide, build
- Governed by design
- Human-in-the-loop
- Retire with evidence

LEGACY TO PRODUCTS

#### Hub + spokes + marketplace

Run, govern and scale

- Central platform services
- Domain data products
- Governance and security
- Self-serve consumption

SUSTAIN AT SCALE

### TARGET END STATE

A MODERN, PRODUCT-ORIENTED DATA ECOSYSTEM

### WHY THIS WORKS

#### Clear accountability

Right capability for the right job

#### Faster time to value

Parallel streams, shared standards

#### Sustainable outcomes

Products, not projects

#### Scales with confidence

Proven model, measurable impact

**A STRONGER  
DATA FUTURE**

ENABLE

MIGRATE

SCALE

## IMPLEMENTATION ROADMAP

# Start focused. Scale with confidence.

A pragmatic path from first product to enterprise scale — with measurable outcomes at each stage.

Progress you can measure. **Value you can scale.**

### Key success factors

- Executive sponsorship**  
Clear mandate and funding
- Right team and skills**  
Cross-functional collaboration
- Disciplined governance**  
Evidence at every gate
- Measure and communicate**  
Value, adoption and retirement

NEXT STEPS

# From conversation to **momentum.**

Let's turn your priorities into a focused plan and measurable outcomes.

## What we need from you

- Access to stakeholders**  
Business, data, technology, risk and finance
- Sample estate scope**  
Systems, domains, key data sets
- Priority outcomes**  
e.g. cost, risk, time to value, regulatory drivers
- Executive sponsorship**  
To remove blockers and enable scale

**From complexity to **clarity.****  
**From legacy to **lasting value.****

**Lower risk**  
Know what to migrate (and what not)

**Faster value**  
Products, not projects

**Sustainable impact**  
Retire cost.  
Scale capability.

SAME  
HIGHER VALUE  
**BRIGHTER TOMORROW.**

Let's build  
your stronger  
data future.
